

cystium-k

Seaweed extract

Biostimulant for
for fruit set

100%
ORGANIC

Low nutrient fertilizer(N-K)

Biotechnology for agriculture

We transform seaweed to regenerate and boost the soil
optimizing agricultural production

We apply principles of the sea
for use in agriculture

We increase the return from
crops in a sustainable way by
applying seaweed and
microbial complexes

Our technology is valid for
all crops and environments

cystium-k

DATA SHEET

características

cystium-k is a liquid biostimulant made from *Macrocystis Pyrifera* algae with a high content of phytohormones and cations.

Its main functions are:

- Contribution of phytohormones for crop management
- Fertilization support

composition

- ✓ 100% *Macrocystis Pyrifera* seaweed extract

physicochemical characteristics

- Total Nitrogen: 0,8%
- Potassium (K₂O): 1,5%
- Mannitol: 1.496mg/kg
- Phytohormones: 7,8 ppm

beneficios

- ✓ Improves crop yields
- ✓ Fruit Curd Improvement
- ✓ Prompts the natural defenses of the crop into action
- ✓ Promotes the development of axillary branching

areas of application

- Foliar
- Irrigation
- Seed

dose

- Seed: 0,5 l/200 kg of seed
- Foliar/root application: (dose/application)

Woody areas	200-350 cc/100 liters of water (per application) *
Herbaceous/horticultural areas	2-3 l/ha (per application) *

* Depending on the crop, the number of applications may vary

* For specific questions about the application, consult our technical department: info@ficosterra.com

Expiration: 2 years from the date of packaging. Once opened, keep in a dark and cool place at temperatures below 22°C and consume within a maximum of 9 months.

presentation

Liquid product, presented in 20 lt, 5 lt, 1 lt

storage

Store in a cool, dry place | Avoid direct exposure to the sun | Harmful if ingested | Avoid contact with the eyes | S2 keep out of reach of children | S13 keep away from food, drinks, and animal feed
